AI SCORPION SFX

Tutorial Guide

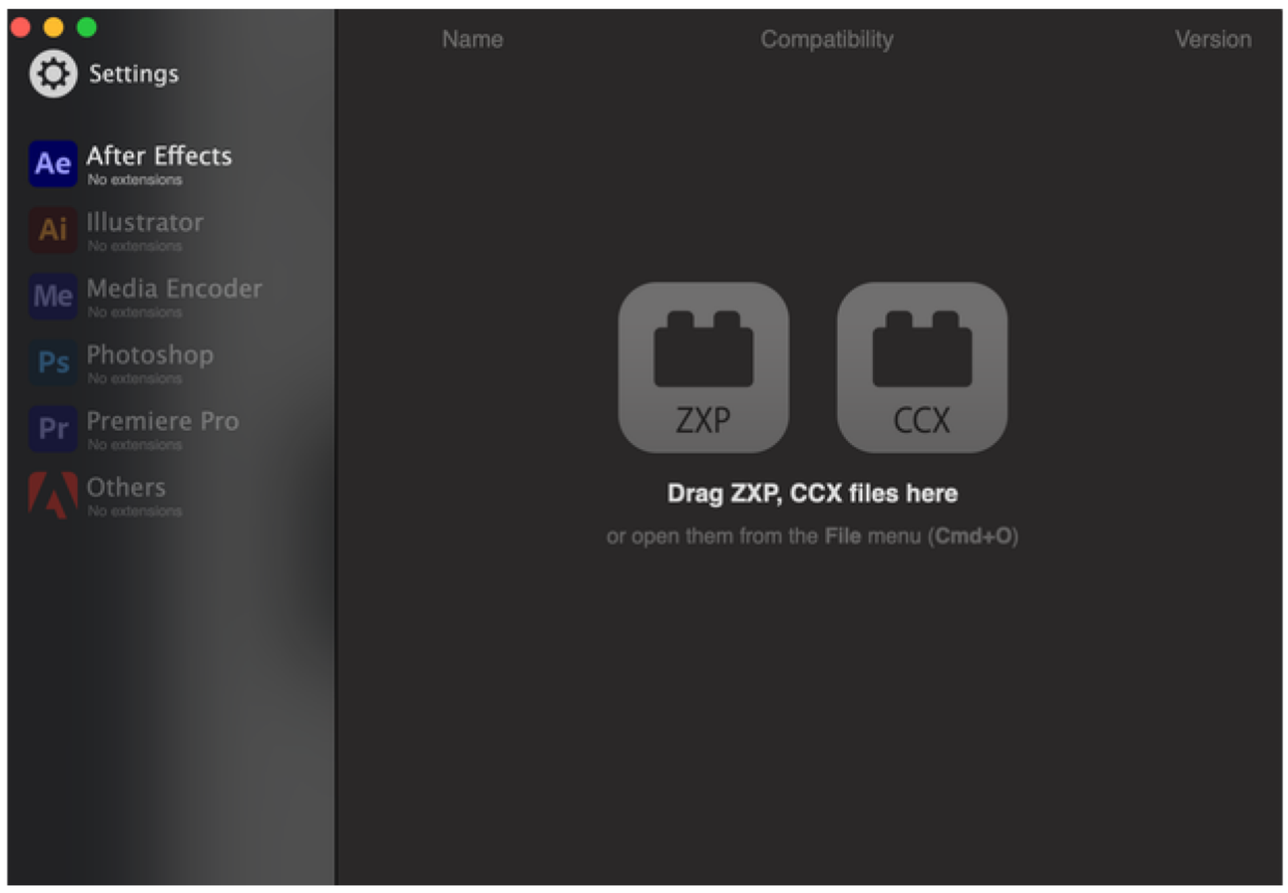

00 Installation

The easiest way to install and license is by using the aescripts + aeplugins manager To install a trial you can select 'Add Trial' from the 'Account' menu.

Alternatively, you can use the ZXP/UXP Installer

aescripts + aeplugins manager

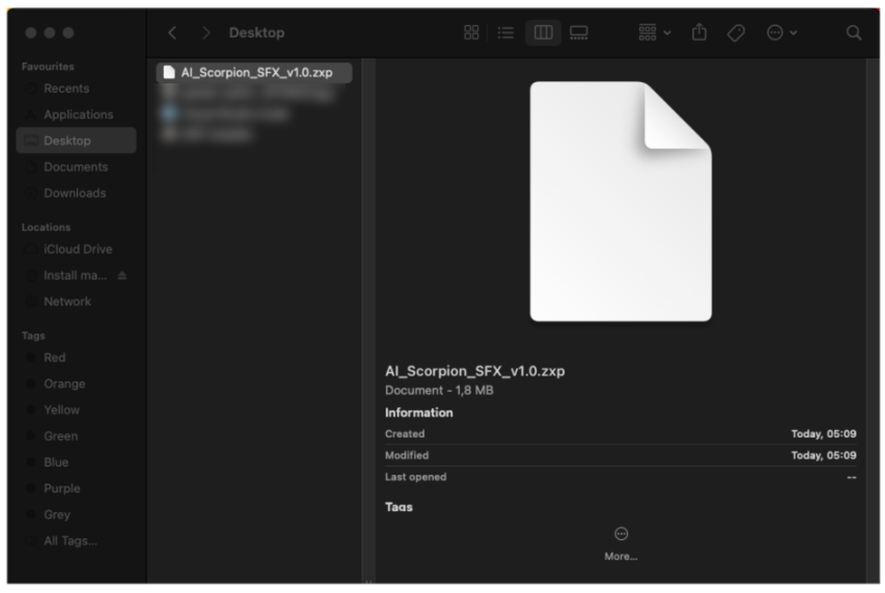

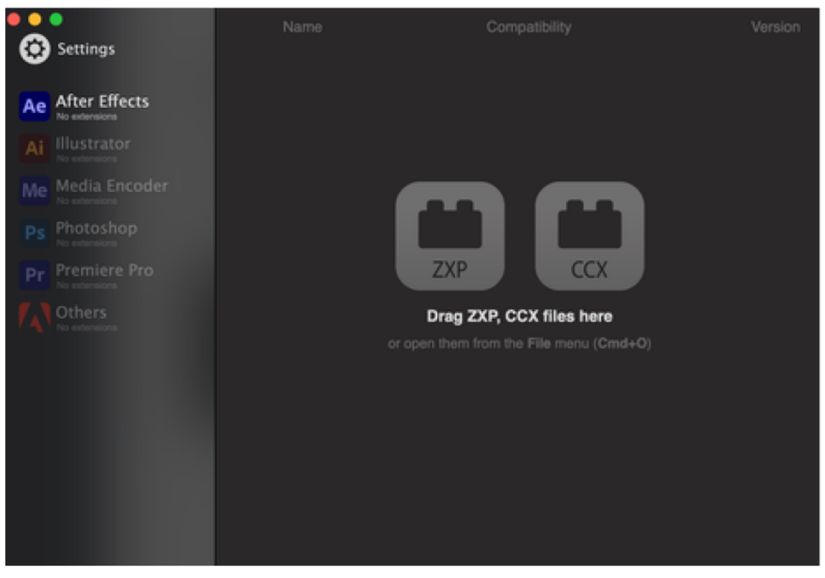

ZXP Installer

01 Installation

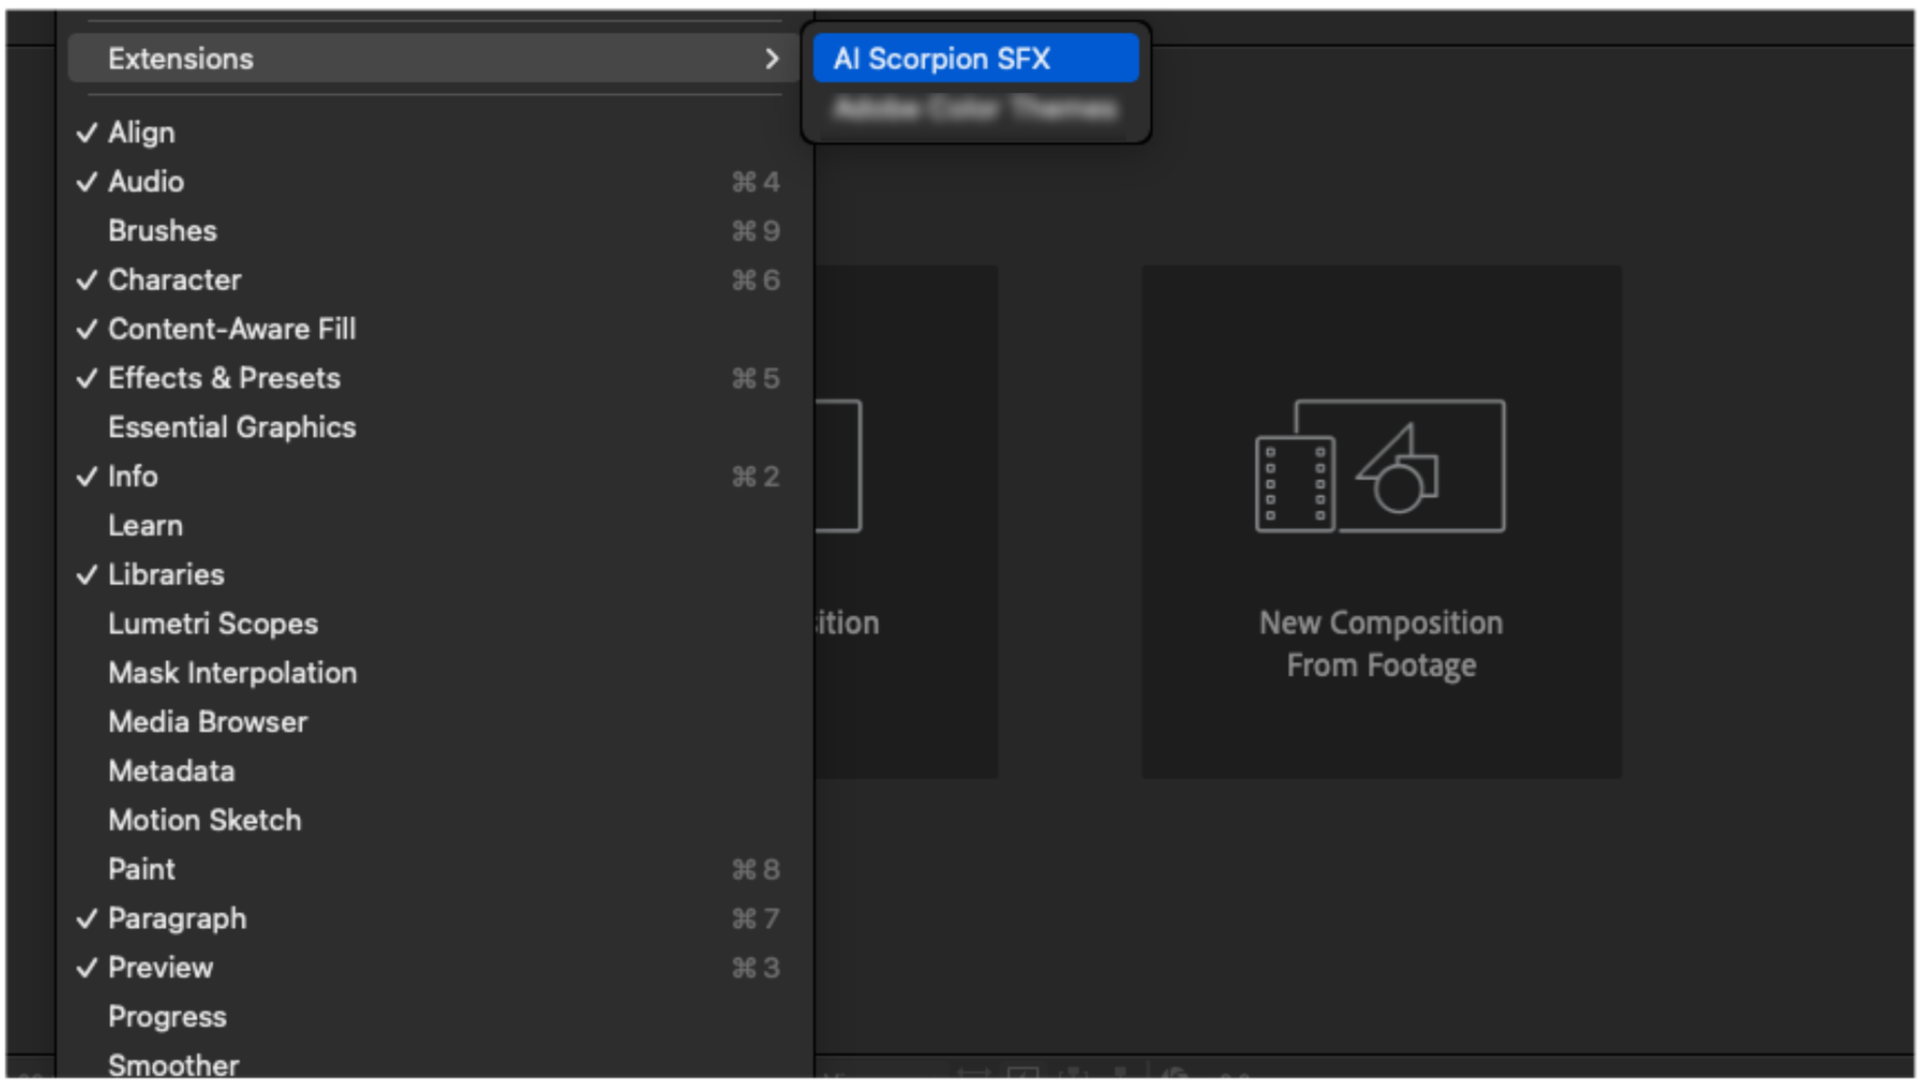

This is a quick start guide for AI Scorpion SFX — a cloud-based sound engine for After Effects and Premiere Pro that allows you to instantly search, preview, and import professional sound effects directly into your timeline.

After purchasing the plugin, you will receive a zip containing a .zxp file. Drag this into a ZXP installer and it will automatically install the plugin to the After Effects versions you have installed.

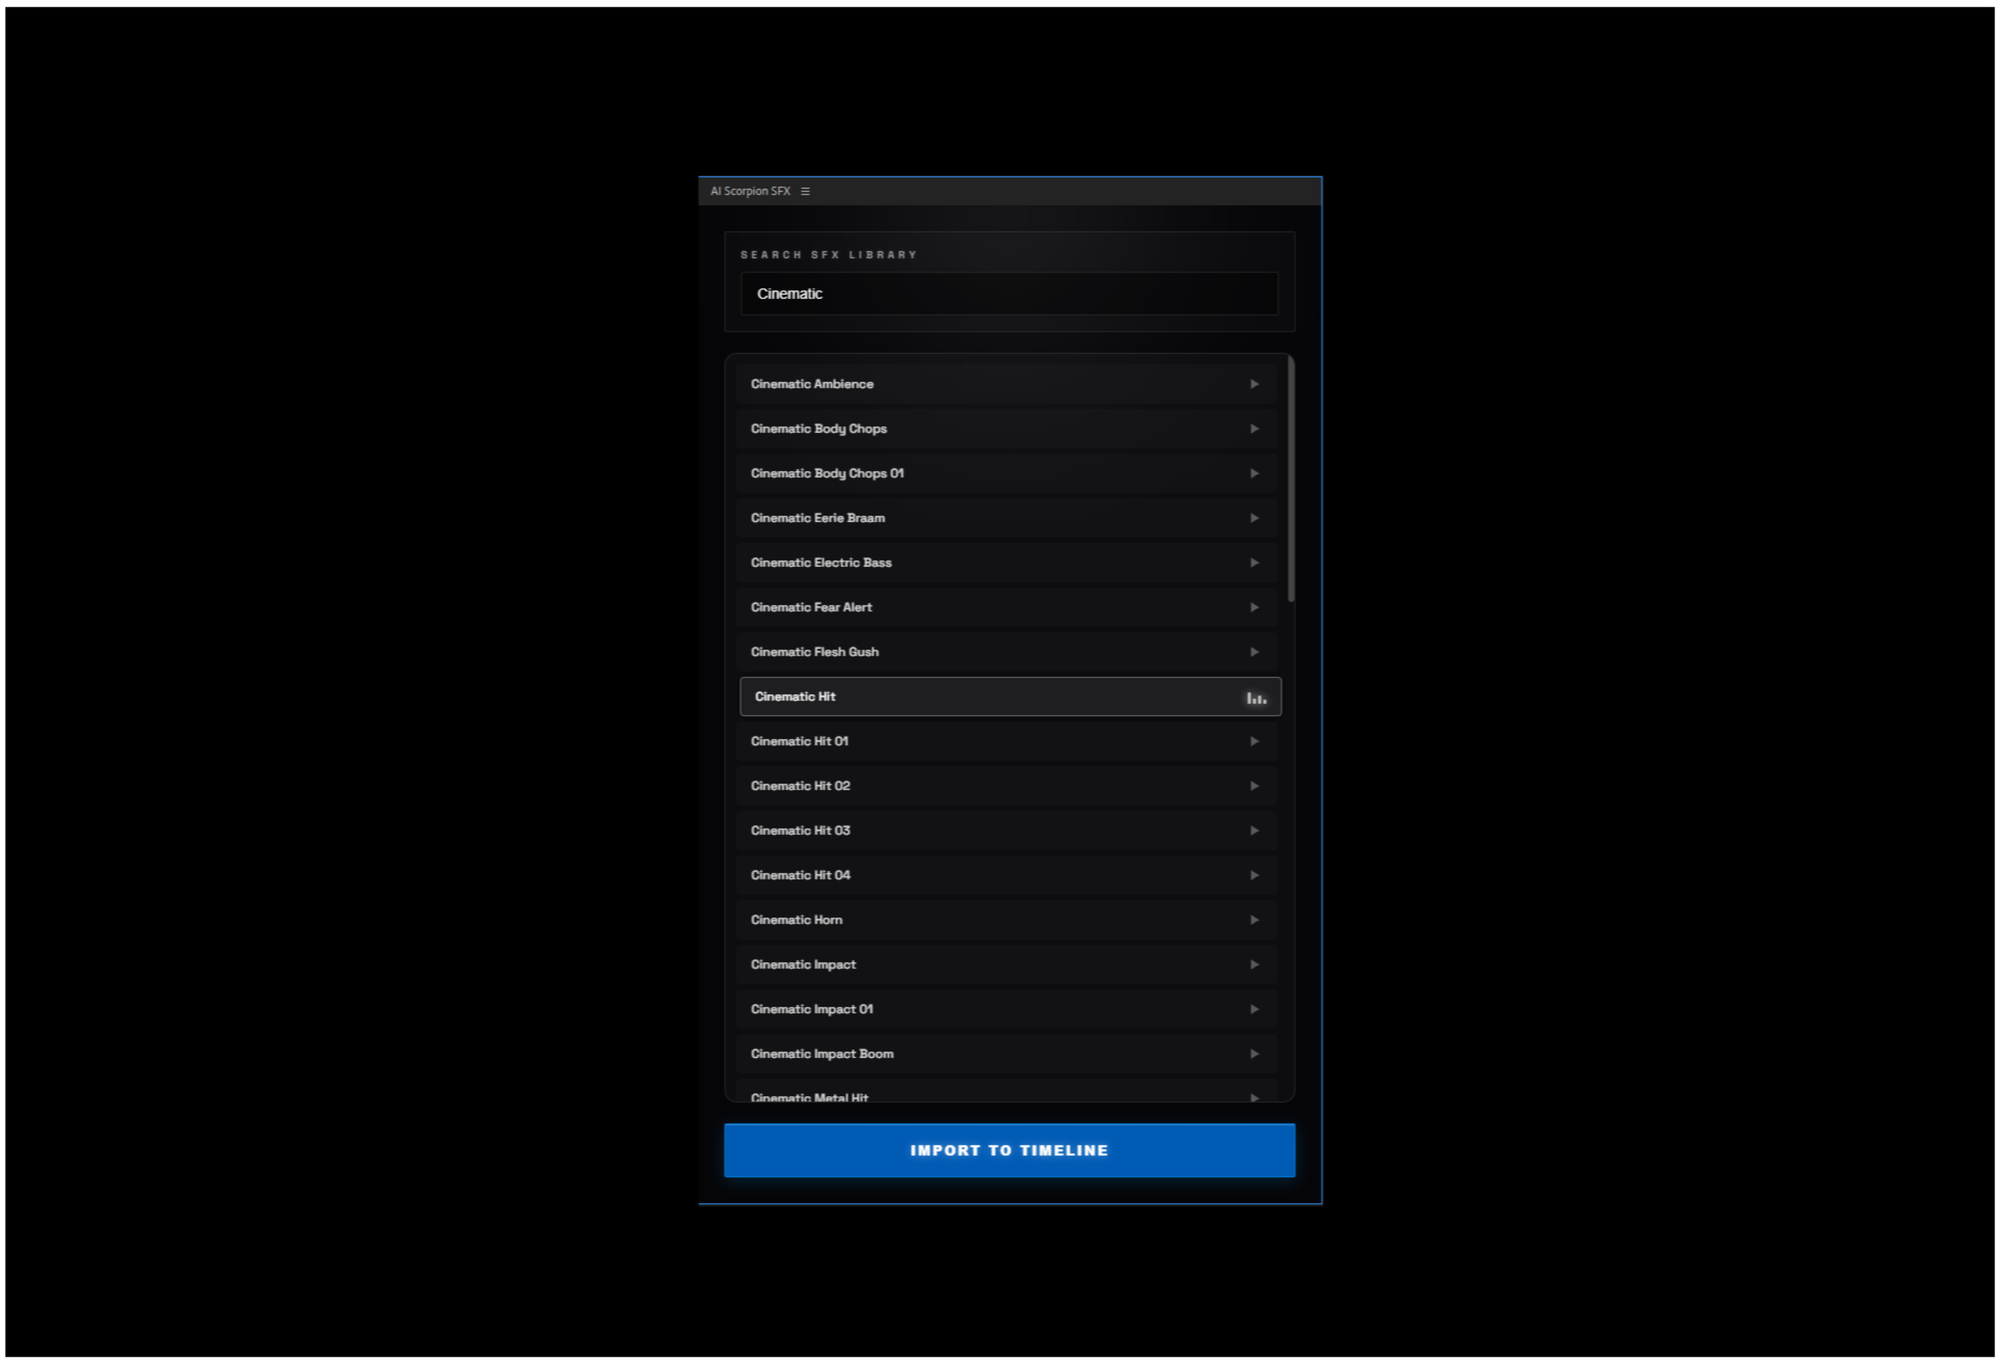

Once the ZXP file has been installed, load up After Effects and go to Window —> Extensions —> AI Scorpion SFX to load the plugin.

03 Any Questions?

Thank you for choosing AI Scorpion SFX. If you have any questions, encounter technical issues, or need assistance, please use the aescripts support system — we are here to help.

AI Scorpion SFX was designed to save you hours of manual work and boost your creative flow. I'm incredibly excited to see the soundscapes you create with this tool. Happy designing!
