Layer Fit Tool
Fit Layer(s)
Fit to Comp
Fit to Comp Width
Fit to Comp Height
Scale Layers according to their width, height or comp size

Consistent Roundness

A 150px radius looks completely different on a tiny square versus a massive background. Checking this box scales the radius automatically so corners look perfectly uniform, no matter the layer size.

Consistent Roundness: ✓

Consistent Roundness: ✗

Above there seven layers that have completely different resolutions, applying a flat 300px radius makes the smaller layers look overly rounded (Right).

With Consistent Roundness checked (Left), RoundPro automatically scales the radius per layer, ensuring a visually perfect match across your entire stack.

Installation and Support

Method 1: aescripts + aeplugins Manager (Recommended)

The easiest way to install and license RoundPro is by using the aescripts + aeplugins manager app.

1. Download the manager app here: https://aescripts.com/learn/aescripts-aeplugins-manager-app/
2. Log in with your aescripts account.
3. Locate RoundPro in your product list and click Install.
   (Note: To install a trial, you can select 'Add Trial' from the 'Account' menu).

Method 2: Manual Installation

1. Extract the downloaded ZIP file.
2. Copy the RoundPro.jsxbin file.
3. Paste it into your After Effects ScriptUI Panels folder:

Windows: `C:\Program Files\Adobe\Adobe After Effects <Version>\Support Files\Scripts\ScriptUI Panels`

Mac: `Applications/Adobe After Effects <Version>/Scripts/ScriptUI Panels`

4. Restart After Effects. Go to Window > RoundPro.jsxbin to open the tool.

Need Help?

Click the **?** button inside the RoundPro panel to open the licensing window, check for updates, or open a direct support ticket.
