Subtext — Caption Editor for Adobe Premiere Pro

Version 1.0.0 · Windows & macOS · Adobe Premiere Pro 2023 or later

> **Installing & licensing.** The easiest way to install and license is with the aescripts + aeplugins manager, or you can install with the ZXP/UXP Installer. To run a free trial, choose **Add Trial** from the manager's *Account* menu.

WHAT SUBTEXT DOES

Subtext is a docked panel that makes caption editing fast: import a subtitle file, refine the wording and timing right in the panel, then push the result straight onto your timeline. Your captions never leave your computer.

GET STARTED IN 4 STEPS

1. Install the extension with the manager (or ZXP/UXP Installer).
2. In Premiere Pro, open **Window > Extensions > Subtext**.
3. Click **Import**, or drag a `.srt`, `.vtt`, or `.csv` onto the panel (a whole folder works too, and you can drag straight from Premiere's Project panel).
4. Edit your captions, then click **Push to Premiere** to place them on a caption track.

The panel's own menu (☰ > **About Subtext**) documents every gesture in detail.

EDITING GESTURES

Fix a word	Double-click the word and type.
Split a caption	Click the `/` between two words.
Merge two lines	Click the trailing `/` at the end of a line.
Add / delete a line	Use the add and delete controls on any caption.
Move the playhead	Click a caption to jump Premiere's playhead to it.
Sync mode	Highlights the caption under the playhead during playback.
Flag for review	Mark a caption with a note; jump between flagged captions.

TOOLS

- **Cleanup:** remove gaps, remove line breaks, remove punctuation.
- **Find & Replace** with match-case and whole-word options.
- **Full undo / redo** and auto-saved sessions with history.
- **Push to Premiere:** places captions on a new caption track and files a versioned SRT copy in a *Subtext* bin in your Project panel.
- **Export SRT** to any location on disk.
- Adjustable UI size, customizable accent color, and an optional light theme (Settings).

PRIVACY

Your captions and files stay on your computer. Subtext never uploads them and collects no personal data, analytics, or telemetry. Its only network use is license validation through aescripts; once activated it works offline.

Support: use the support contact on the Subtext product page at aescripts.com. Keep your license key as your proof of purchase.

Subtext is an independent product and is not affiliated with, endorsed by, or sponsored by Adobe. Adobe and Premiere Pro are trademarks of Adobe Inc.
