How to Install VHSCraft

RECOMMENDED: INSTALL AND LICENSE

The easiest way to install and license is by using the aescripts + aeplugins manager.

https://aescripts.com/learn/aescripts-aeplugins-manager-app/

VHSCraft uses license verification. The manager handles installation and licensing in one place.
To start a VHSCraft trial, choose Account > Add Trial in the manager.

Manual installation

1. Download the plugin file
   `(.aex for Windows, .plugin for macOS)`
2. Place the file in the appropriate Plug-ins folder:

   Windows (After Effects / Premiere Pro):

   ```
   C:\Program Files\Adobe\Common\Plug-ins\7.0\MediaCore\
   ```

   macOS (After Effects / Premiere Pro):

   ```
   /Library/Application Support/Adobe/Common/Plug-ins/7.0/MediaCore/
   ```

3. Restart After Effects or Premiere Pro

After restarting, VHSCraft will appear in the Effects panel.

LICENSE VERIFICATION AFTER MANUAL INSTALLATION

In After Effects, use the effect's Register option. In Premiere Pro, use its Options entry to open the registration dialog.

Thank you for choosing VHSCraft

Hey (๑´ڡ`๑)

Thank you for choosing VHSCraft! Your support means a lot to me and motivates me to keep improving the plugin.

VHSCraft helps you give your footage the character of VHS tape in Adobe After Effects and Premiere Pro. Choose between Classic VHS and Cinematic VHS, start with one of eight presets, then fine-tune the noise, tracking, distortion, color bleed, glow, and color grading to create your own look.

If you have ideas, feature requests, or suggestions, I'd love to hear from you.

If you encounter an issue or need technical support, you can also submit a request here:

https://aescripts.com/contact/

Your feedback helps make VHSCraft better.

If you enjoy using it, feel free to share it with friends or fellow creators 🙌

Thanks again for your support!
